

Assignment Content

Question 11 / 1

A clear statement of the goals and objectives of the project is: in the analysis phase, the development of the _____ occurs.

Hide answer choices

- documentation
- flowchart
- program specification**
- design

Question 21 / 1

_____ transforms class models into design class realization and prepares data structure (data design) required to implement the software.

Hide answer choices

- Data Design**
- Architectural Design
- Interface Design
- Procedural Design

Question 31 / 1

Structured Analysis is based on, which principles?

Hide answer choices

- Top-down decomposition approach
- Divide and conquer principle
- Graphical representation of results using DFDs
- All of the mentioned**

Question 41 / 1

What is the solution for Structural design?

Hide answer choices

- The specification model following data flow diagram
- Procedures represented as bubbles
- Specification model is structure chart showing procedure calling hierarchy and flow of data in and out of procedures**
- Emphasizing procedural decomposition

Question 51 / 1

Which of the following is an incorrect method for structural design?

Hide answer choices

- Transition of problem models to solution models
- Handling of larger and more complex products**
- Designing Object oriented systems
- More procedural approach
